The Manipal heritage

The Manipal Education and Medical Group (MEMG) is a leading provider of education, research and healthcare.

The Group operates universities and medical colleges in Antigua, Dubai, Malaysia and Nepal, and its universities in India rank in the top echelon of private universities. Also, through its various professional academics, the group provides education and upskilling opportunities to executives from leading corporations and financial institutions.

The Manipal Education Mantra — Achieve, Enable and Transform — builds on a legacy to create a future for every life it touches, a future that inspires achievements, enables ambitions, and transforms lives, worldwide.

International accreditations and recognitions

Manipal GlobalNXT a university for the digital era

Manipal GlobalNXT University is a pioneering university that sets a standard in digital, online education. With its unique virtual classroom pedagogy, the university brings together a student community and leading faculty from across the globe universities who are part of the Universitas 21 network. At the invitation of the Malaysian Ministry of Higher Education to create a world-class, technology-enabled university, Manipal GlobalNXT was formed in partnership with the Manipal Education and Healthcare Group. Today, the university is ideally placed to take forward U21 Global's original vision of global borderless education.

- Connect with global faculty spread across the world
- Establish Global Network

Overview

The Master of Education (MEd) is a two years' research-based program. The program is meant for individuals who wish to prepare themselves for a career as an educator. With growing pace of technology and market competition, continuous education as well as innovation has become a necessity for sustenance of organisations. The program is designed to foster talent for the education sector in Malaysia and other countries as required by today's knowledge-based economy.

Learning Outcomes

Apply and integrate knowledge relating to current research issues in specific areas of study

Apply research techniques to acquire, interpret and extend educational knowledge in areas of study

Demonstrate the capability to communicate, lead and work together in building new knowledge

Synthesize advanced knowledge and engage in problem solving and scientific skills

Demonstrate the capabilities and dispositions to work as engaged professional educators in building learning communities into the future

Design and conduct research professionally and ethically; and

Continuously, incrementally, and cumulatively develop encyclopaedic general knowledge and diverse individual talents and potentialities.

Program Modules

- Research Methodology 1
- Research Methodology 2
- Research Project (Dissertation)
