**MASTER YOUR
FUTURE**

The Manipal heritage

The Manipal Education and Medical Group (MEMG) is a leading provider of education, research and healthcare,

The Group operates universities and medical colleges in Antigua, Dubai, Malaysia and Nepal, and its universities in India rank in the top echelon of private universities. Also, through its various professional academics, the group provides education and upskilling opportunities to executives from leading corporations and financial institutions.

The group manages 11 hospitals including 8 teaching hospitals, making it Asia's largest healthcare management group.

The Manipal Education Mantra — Achieve, Enable and Transform — builds on a legacy to create a future for every life it touches, a future that inspires achievements, enables ambitions, and transforms lives, worldwide.

International accreditation and recognition

Manipal GlobalNXT a university for the digital era

Manipal GlobalNXT University is a pioneering university that sets a standard in digital, online education. With its unique virtual classroom pedagogy, the university brings together a student community and leading faculty from across the globe.

The institution was first established in 2001 as U21Global, a joint venture involving many of the world's top 200

universities who are part of the Universitas 21 network. At the invitation of the Malaysian Ministry of Higher Education to create a world-class, technology-enabled university, Manipal GlobalNXT was formed in partnership with the Manipal Education and Healthcare Group. Today, the university is ideally placed to take forward U21 Global's original vision of global borderless education.

Manipal GlobalNXT at a glance How students learn

FROM ANYWHERE

Our virtual classrooms provide the best online learning experience by combining live virtual webinar sessions with self-paced study

- Next generation learning portal

- Peer learning through assessed online discussion forums
- Connect with global faculty spread across the world
- Establish Global Network

Master of Science in Information Technology (MScITM)

The MSc in Information Technology Management (MScITM) is designed to develop leaders who can align IT strategy with business goals.

Most IT professionals begin their IT career doing technical work. However, as they climb up the career ladder towards more senior roles such as IT project manager, solutions manager or IT Director, a broader set of management skills gets important. In short, these individuals need skills that will help them bridge the gap between IT and business.

As a student, you will gain a broad skill set, which will enable you to manage the development, acquisition and operation of technology in a global, competitive environment. You will learn to evaluate a technology in terms of its potential in market, the risks involved to implement and manage change and how to exploit innovation.

The program aims to create flexible individuals who can analyse business opportunities, operationalize technologies and innovate in ways of working.
